

The Future of Embodied AI: Humanoid Robotics

Circulus Robotics, Intel and Red Hat

Jonggun Park
CEO
Circulus Inc.

Umesh Papadkar

Intel

Fabien Dupont
Distinguished Engineer
Red Hat

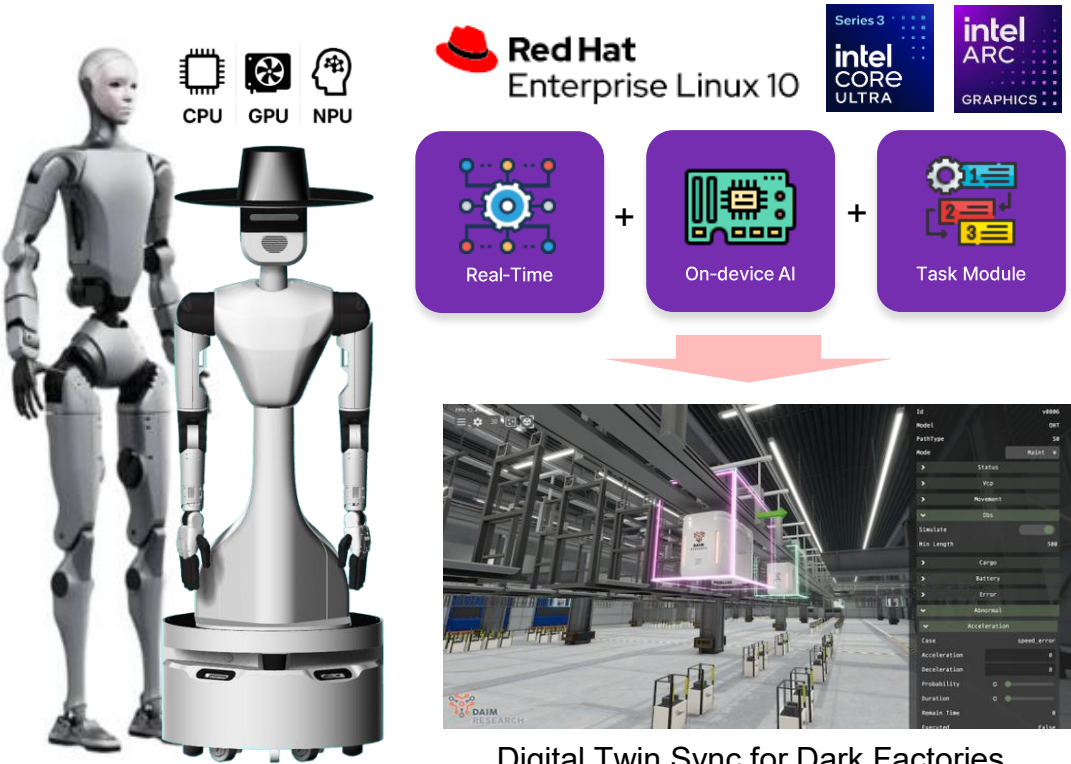

Physical AI Brain on Core Ultra 3

On-device Physical AI for Heterogeneous Robots

Establishing the 'WINTEL' Standard: Unified CPU·GPU·NPU Architecture for All Robots

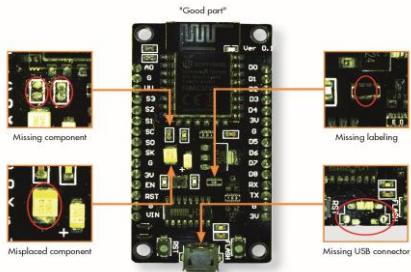

On-device Physical AI for Heterogeneous Robots

Proven Killer Apps for Factory Operations

Pick & Place

Inspection

Worker Safety (PPE)

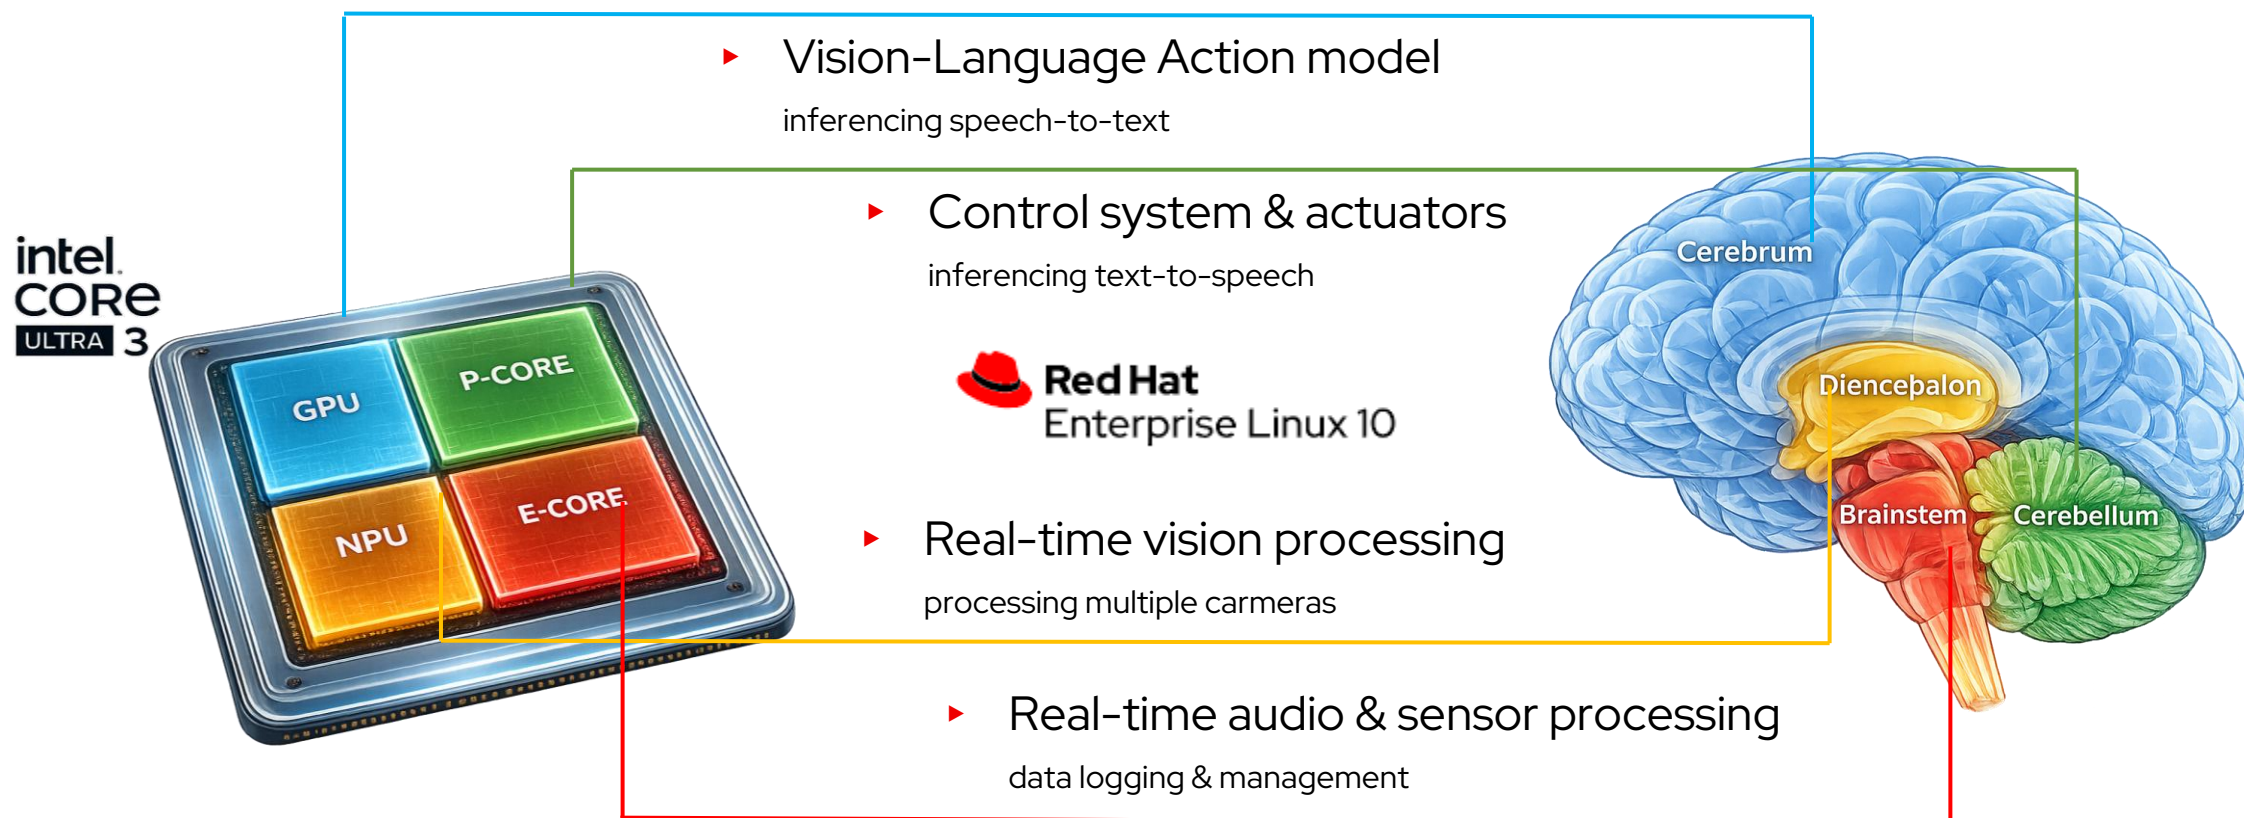

Inventory Check (RFID)

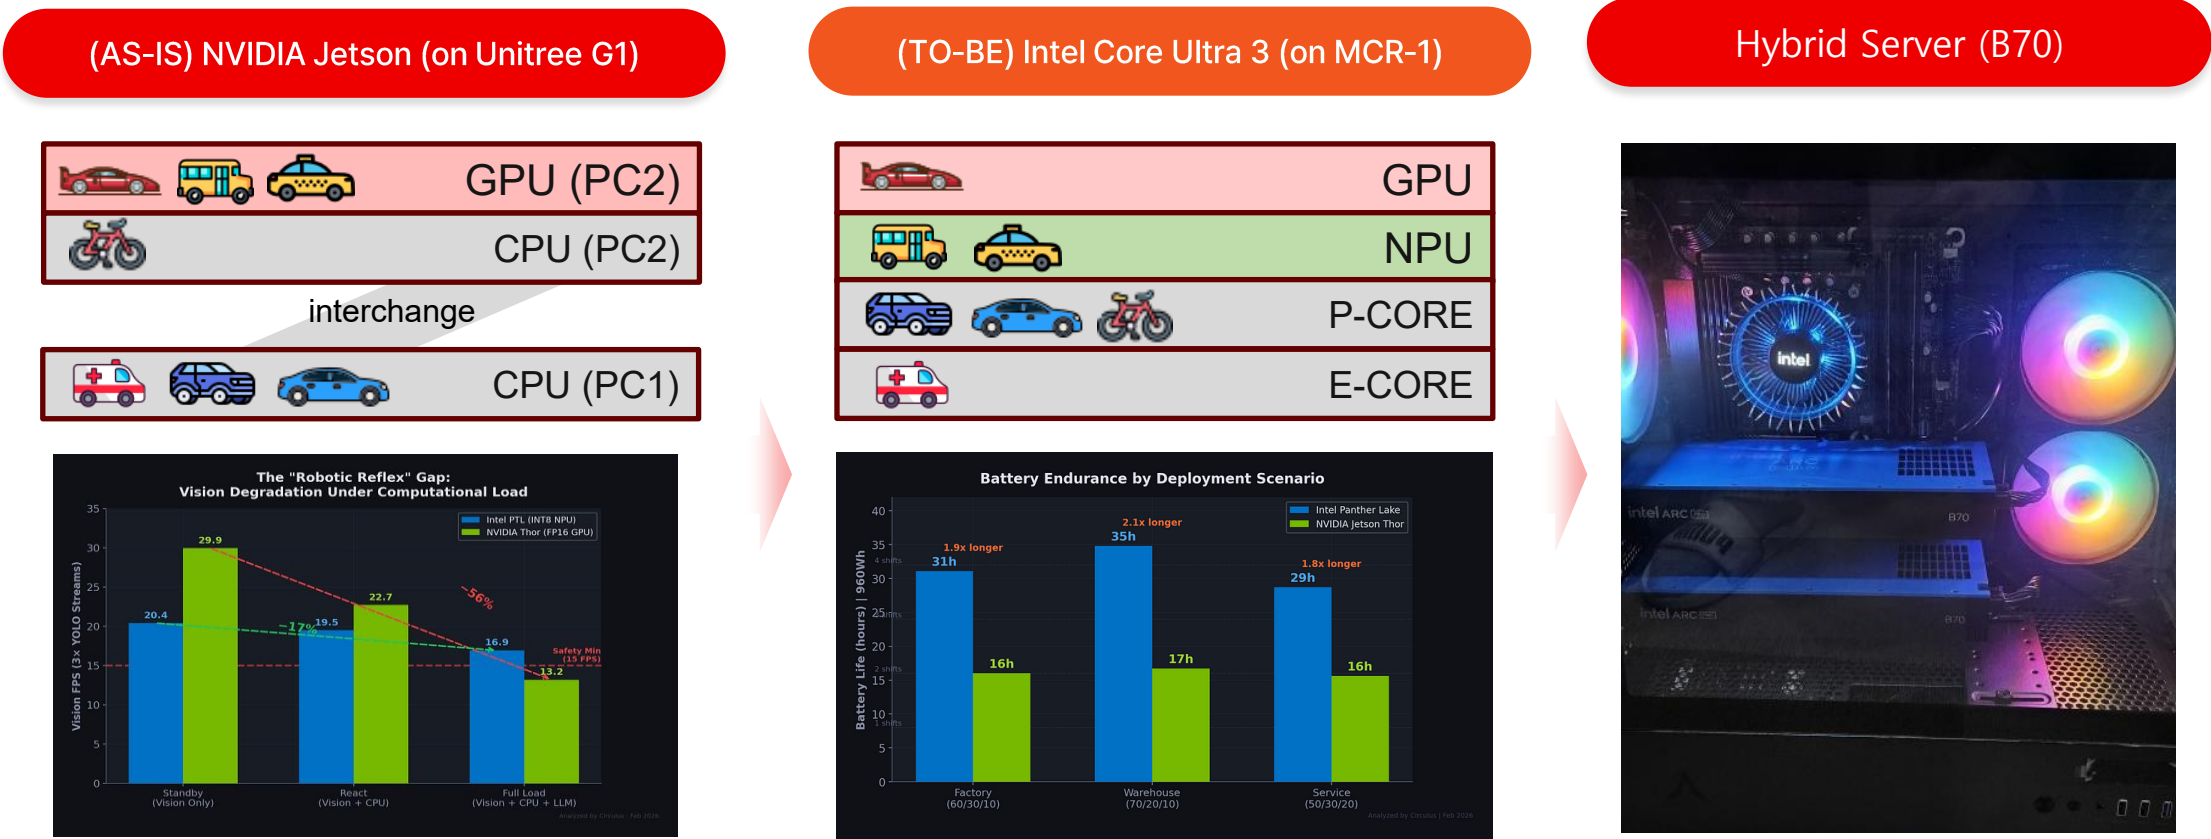

Intel Core Ultra: The Most Human-like Brain for Humanoids

Based on the stability and reliability of RedHat RHEL 10.2

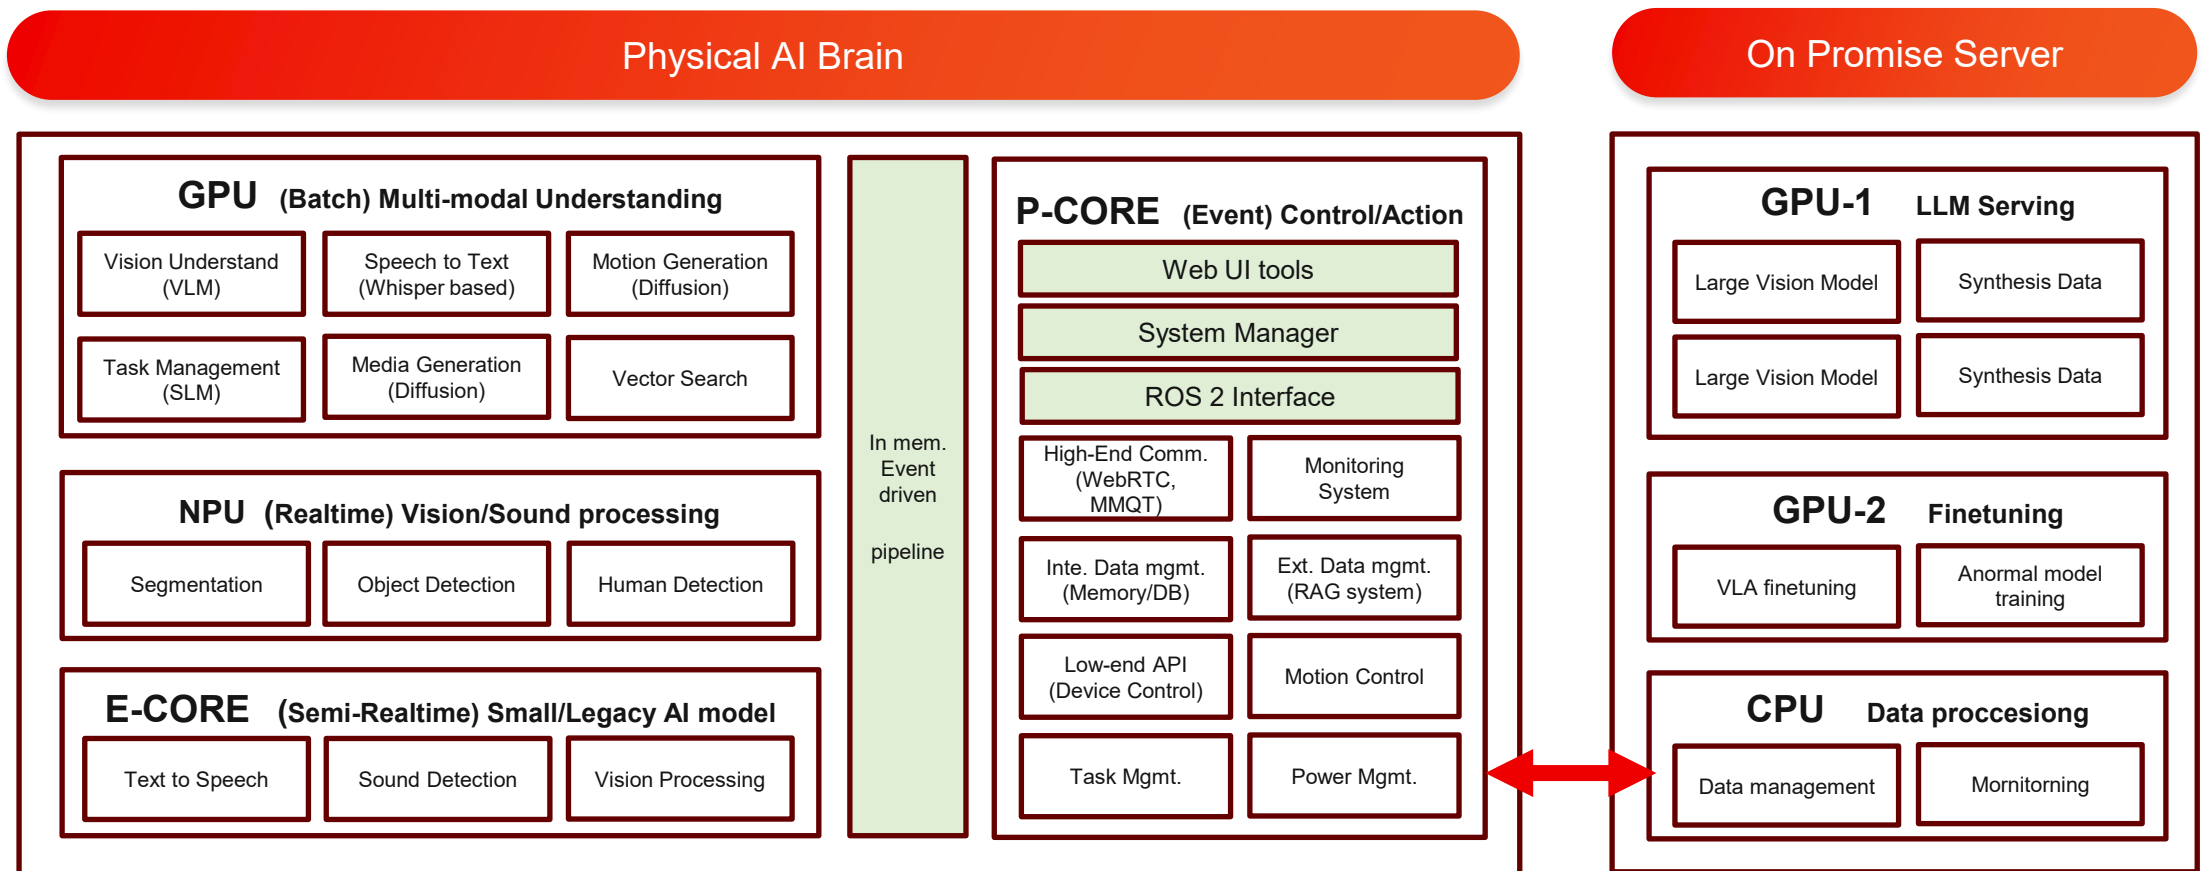

A giant leap toward a human-like brain for humanoid

Beyond Single-Channel: Intel Core Ultra’s Multi-Engine Synergy (GPU, NPU, P/E-core)

Specialized Engines, One Unified Intelligence

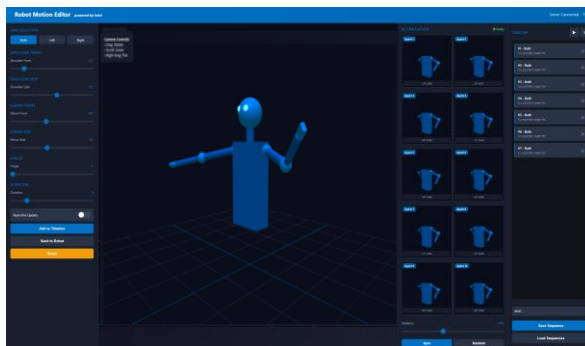

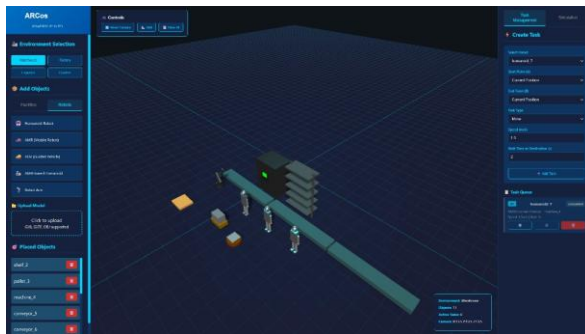

Optimized Orchestration: Distributing Perception, Understanding, and Action

From Simulation to Reality: Scaling Humanoid Deployment

Maximizing cost-efficiency and operational safety through Digital Twin-driven training

Digital Twin / Virtual Training

(Efficiency) Cost-effective deployment

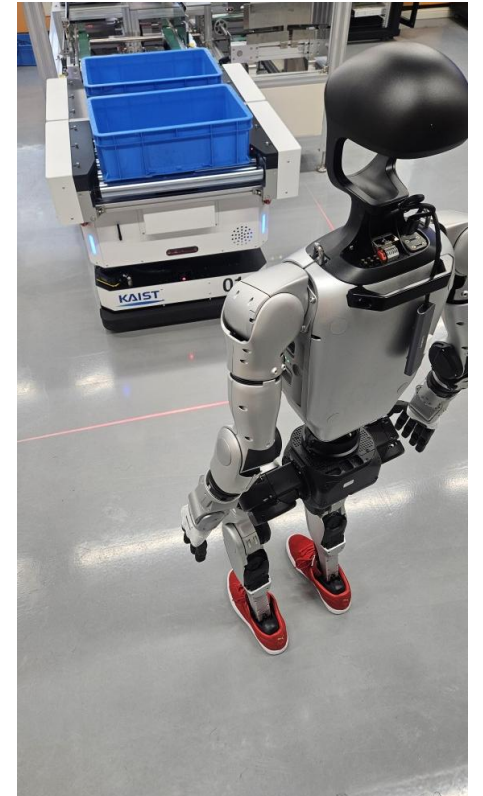

(Safety) K-HUMANOID

From Vision to Action: High-Performance Physical AI for Factories

Building a world-class humanoid ecosystem optimized for global industrial standards
